There are many features to consider when selecting the perfect chair to suit your needs. The following symbols will help you choose the product enhancements that are right for you. These symbols are referenced throughout this catalog to help you quickly identify each chair's features.

The descriptions of the features shown are meant to be general explanations. The actual functions of these features may vary slightly.

**Pneumatic Seat Adjustment**  
 Allows quick and easy adjustment. Regulates height of chair relative to floor.

**Back Height Adjustment**  
 Allows positioning of lumbar support within a fixed range to alleviate back stress.

**Seat Depth Adjustment**  
 Positions chair back relative to seat to reduce pressure on the buttocks and thighs for both taller and shorter users.

**360° Swivel**  
 Chair rotates a full 360° in either direction for ease of motion. Standard on every executive chair.

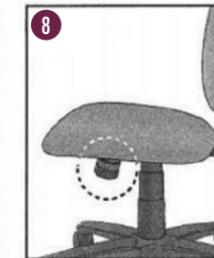

**Tilt**  
 Pivot point located directly above center of chair base (white dot indicates pivot point).

**Mid-Pivot Knee Tilt**  
 Pivot point located slightly ahead of center of gravity (white dot indicates pivot point). Allows user to recline at a slightly more relaxed angle than conventional center tilt.

**2-to-1 Synchro Tilt**  
 Back reclines at 2-to-1 ratio to seat angle. Allows user to recline while keeping seat cushion relatively level to floor.

**Tilt Tension**  
 Controls rate and ease with which chair reclines for different weights and strengths of users.

**Tilt Lock**  
 Locks out tilt function when chair is in upright position.

**Multi-Task Control**  
 Adjusts seat and back angles with a single lever (infinite locking within a fixed range), reducing fatigue in back and thighs.

**Adjustable Lumbar Support**  
 Lumbar support can be adjusted up and down.

**Seat Slider**  
 Seat slides forward or back with control lever then locks in place. This feature allows users of all sizes to easily custom fit thigh and back support.

**Multi-Function**  
 Three levers to modify angle of back relative to the seat, control tilt and forward for keyboard intensive activities. Tilt is free float or locking within a fixed range.

**Auto Adjusting Synchro Tilt**  
 This self-adjusting control uses your weight to balance the force needed to recline the back. Back tilt is controlled by a single lever which will lock in 5 positions. When tilting, the seat tilts at a 4-to-1 ratio to the back.
